

Lessons learned (Oregon)

- Build an automatic reconciliation for your Gateway
- Build your Gateway with multiple instances in mind
- Find out how easy it will be to accommodate new vendor content for the 1040 MeF platform on your website; ours proved to be rather inflexible
- Even if your MeF project team has been busy for years, don't assume that everyone in the agency knows that a new platform is coming.
- We reduced the size of our PATS suite, and modeled the ATS suite on the condensed PATS
- At times you may end up in competition with 1120 or Legacy for technical resource; be flexible
